Education

RV College of Engineering Aug 2023 – Present
B.E. in Artificial Intelligence and Machine Learning *CGPA: 9.16/10*

Experience

Lume CXM (Block 8 Solutions Pvt. Ltd.) Bengaluru, IN
Founding Engineer Intern Jun 2026 – Present

- Engineered fully branded guest web applications for premium Indian resorts, supporting the end-to-end guest journey from pre-arrival through checkout as one of the earliest engineers at a bootstrapped hospitality-tech startup.
- Developed the frontend from scratch by translating Figma designs into production-ready web interfaces and implementing the core product experience.
- Deployed the platform on Railway and hardened backend infrastructure using private networking, with the application running in production across 3 resort properties.
- Led project and development activities, driving technical implementation and coordinating the product development lifecycle.

Projects

QuarksFinance *Python, Flask, SQLite, React, Next.js* Live Demo | GitHub

- Integrated the yFinance API with a Flask and SQLite backend to deliver real-time market data and sentiment analysis in a full-stack stock analytics platform, with a React/Next.js frontend deployed on Vercel.
- Designed modular strategy pipelines for comparative backtesting of trading algorithms on historical market data.

ParknGo *React Native, Express.js, FastAPI, MongoDB, Cloudinary* GitHub

- Engineered a smart parking platform with real-time booking, QR-based entry/exit, and automated billing across a React Native, Express.js, FastAPI, and MongoDB stack, with Cloudinary integration.
- Implemented JWT authentication and Role-Based Access Control (RBAC) across 3 roles (user, manager, owner), alongside dynamic pricing and ML-based demand prediction.

Hatch – Hackathon Management Platform *Flask, MongoDB, TypeScript* Live Demo | GitHub

- Delivered a full-stack hackathon management platform with Flask and MongoDB spanning 5 workflows: registration, team formation, submissions, evaluations, and event management.
- Streamlined event coordination through Flask APIs and admin panels, reducing manual coordination effort by 40%.

Technical Skills

Languages: Python, Java, C, JavaScript, TypeScript, HTML, CSS
Backend & Web: Node.js, Express.js, Flask, FastAPI, Spring Boot, JWT Authentication, RBAC
Frameworks & Libraries: React, Next.js, React Native
Databases: SQL, MongoDB, SQLite, Firebase
Cloud & Tools: AWS, Railway, Vercel, Git, MATLAB

Achievements

Winner, WhiteHack 1.0 – National Online Web Development Hackathon (built Hatch) Aug 2025
Runner-Up, ExploreLikeALocal Hackathon – Tourism Web App Sep 2024

Publications & Patents

AI-Driven Pathogen Profiling in Scientific Literature using NLP (Published Jan 2025)
DOI: 10.37896/sr12.1/006

ORION (Patent Application, India; Filed Mar 2026) Application No. 202641030238
S. Nandi, B. Sathish Babu, Chirag H, J. R. Mathew
Closed-loop retail intelligence system linking consumer consumption behaviour with real-time inventory control through predictive demand forecasting and role-specific alerts; published in the Patent Office Journal (29 May 2026).
